Basic Python Coding

**Tuesdays, October 15, 22, 29 and
November 5 & 12, 2019 • 6:30-8:30 PM**

Rotary Room, Main Library

Experience the power of writing programs to make computers perform tasks for you. Python is a versatile, modern programming language that you can use to write an app, build a website, analyze data, control a robot or even build a self-driving car. In this 5-week course you will learn to write simple programs in Python and develop the basic skills required to communicate with computers. Discover the pleasure of finding things out by exploring interesting problems through programs you write.

A basic working knowledge of computers is required, but no programming experience is necessary. Laptops will be available for use during the class or you can bring your own. Seats are limited. **Registration is required.**

Presenter:

Dr. Varghese John

is an experienced technologist with extensive scientific research experience and a love for learning and teaching. He has led large global technology teams to deliver innovative solutions to complex problems for leading financial service organizations. VJ is passionate about STEM education.

All programs are free and open to the public. Limited seating.

Register online at fairfieldpubliclibrary.org, or call 203-256-3160.
