

Beyond the Breed: Exploring Dog DNA with the CT Humane Society

Wednesday, February 26th 🐾 6:30 pm
Fairfield Woods Branch Library

Join us for this informative program with the **Connecticut Humane Society!** Dog owners are becoming increasingly interested in the genetic make-up of their furry family members. As the popularity of Canine DNA testing grows and the trend of Breed Reveal Parties takes hold, the need for a general understanding of dog evolution and genetics grows. In order for owners to fully understand how their small mixed breed dog could possibly have German Shepherd in its DNA, they need a basic understanding of canine genetics. This program will provide the skills needed to identify dog breeds based on their phenotypic characteristics, give background information in canine evolution, and provide a basic understanding of canine genetics. **For Teens and Adults.** *No dogs will be at this presentation.*
