

# Printing AI Posters using *Canva*

with Gary Webster

**Monday, December 8th, 2025**

**6:30pm - 8:00pm**

**Fairfield Woods Branch Library**

ChatGPT now has the ability to draw anything you can describe with words. The problem is what words to use to get results you actually want. Becoming familiar with the way GPT works and the language that it responds to is key. In this session we'll use proven prompts to create 24 different art work styles ranging from "wire-frame" to "pixel art" to "anime style". Then download and print with Canva, a free and powerful printing app.

Don't miss this event and be sure to bring your devices and a working Google account to try these things yourself!

**Presenter Gary Webster** is a dynamic technology integrator, industrial designer and certified teacher, teaching technology and design in the classroom. With over 15 years' experience, he's taught web design, page layout, podcasting, movie making and photo editing at Southern Connecticut State University.
